Keyboard

Sample code

```
function init() {  
  //write your code here  
  /*plat.innerText = navigator.platform  
  navigator.getBattery().then( b => level.innerText = ((b.level)*100)+"%")  
  navigator.geolocation.getCurrentPosition(l => (loc.innerText = l.coords.latitude.toFixed(4)+"",  
    +l.coords.longitude.toFixed(4)))*/  
  navigator.getBattery().then(b => {  
    b.onlevelchange = () => bat.innerText = 100 * b.level + '%'   
    b.onchargingchange = () => prop.innerText = (b.charging ? "Charging" : "Discharging")  
    b.ondischargingtimechange = () => leftTime.innerText = "Remaining: "+(b.dischargingTime/3600).toFixed(2)  
  })  
  onkeydown = event => key.innerText = event.key  
  onkeyup = event => key.innerText = event.key  
  ononline = () => onoroff.innerText = "online"  
  onoffline = () => onoroff.innerText = "offline"  
  document.title = "Classwork 11";  
  sample.innerText = init  
}
```
